Annual Membership Options

All companies associated to Train the painter must have an appropriate membership

Membership	Benefits	Fee Per Annum
Registered Company	<ul style="list-style-type: none"> • Deliver the Train the painter programme to staff only, in a single country. • Deliver accredited comprehensive training internally • Affordable and flexible • Demonstrate a commitment to high quality workmanship 	£1,250* per country
Affiliate Training Provider	<ul style="list-style-type: none"> • Deliver the Train the painter programme to staff and external customers. • Fantastic business opportunity with high earning potential • Assist in raising standards across the industry • Access to central marketing and sales resources 	£2,750* per location
Associate Company	Access to the training platform only	£500
Global Affiliate Training Provider	Unrestricted access and training opportunities globally	£25,000

*£250 joining fee is due upon initial registration.

Please contact the Corrodere Academy for further information info@corrodere.com

Training Equipment Requirements

Trainer is responsible for:

- A risk analysis/assessment is available for the practical assessment
- When using coatings, solvents etc., that the products have been assessed and control measures are in place (COSHH or equivalent)
- The correct level of PPE and RPE is available to the student
- The plant and equipment are safe to use and (where applicable) tested/certified for use
- The test plates are suitable as per the practical assessment guides (or the alternative live structure, if this meets the requirements)

Practical Equipment (specific to individual task)	✓
Needle gun	
Hard wire brush	
Mechanical wire brush (spare brush heads)	
Disk grinder/rotary grinder or sander	
Scraper	
Chipping hammer	
Compressed air/electrical supply (as necessary)	
Heaters (if required)	
De-humidification (if required)	
Lighting (direct and in-direct)	
Washing unit (variable sizes)	
Steam cleaner (if applicable)	
Solvent (washing) rags	
Blasting equipment (blast post and associated equipment) - variable sizes available	
Spraying equipment (spray pump and associated equipment) - variable sizes available	
Abrasives	
Paint/solvents	
Abrasive paper	

PANELS	
Individual panels for Protective Coatings Applicator	
Group panels for Protective Coatings Applicator, Abrasive Blast Cleaner and Spray Painter	
Misc panels	

Group Panel

Individual Panel

BLAST CHAMBER/CABINET (specialist blast cleaning module)	
Blast chamber that will allow the student and trainer access (3m x 6m minimum)	

SPRAYING FACILITIES (specialist spray painting module)	
The spraying should be conducted in an environment suitable for coating application in a safe manner that allows access to the student and trainer. This could be a spray booth (3m x 3m minimum) or a paint shop with suitable flooring, lighting and extraction	

THEORETICAL	
Classroom must be a suitable size to accommodate the number of trainees attending the course	
A laptop/PC to access the training material	
Suitable audio visual equipment. This may be either a projector and screen or individual monitors for each trainee	
A good surface for taking notes and for theoretical assessments	
Notepads and pens	
Adequate refreshments should be available throughout the duration of the course	
Lunch facilities	
Adequate parking available for the number of trainees attending	
Joining instructions, location of the training facility and access via public transport	
A list of local hotels and B&B's to suit all budgets should be provided with the joining instructions	
Toilet facilities	

Train the Trainer

The accredited Train the painter programme must be delivered by an approved trainer.

1. Select an appropriate person to approve as a Trainer to deliver the Train the painter programme
2. Pre-requisite - Level 2 coating inspection certificate or 5 years Coating Applicator, Supervisor, Manager or Inspector experience.
3. Attend a two day Train the trainer course available in person or online and in all time zones.

Agenda

Day 1	
08:45 – 09:00	Registration
08:45 – 12:30	Introduction and Objectives of the course Opening a Training session Understanding your students Communication Skills for Training Questioning Skills for Trainers Listening Skills for Trainers
12:30 – 13:00	Lunch
13:00 – 16:00	Presentation Skills in Training Developing Participation in Training Managing Questions and Answers Dealing with Difficult Trainees Health & Safety & how to deliver the Train the painter practical training element
16:00 – 17:00	Preparing presentations for day 2 with trainer
Trainers will be asked to select a module from the training material, prepare this evening and present on day 2 The presentation is to last approximately 20 Mins and will be videoed for feedback.	

Day 2	
09:00 – 09:15	Overview of Day 1
09:15 – 10:00	On line platform presentation inc all modules
10:00 – 12:30	On line training platform functionality and documentation
12.30 – 13.00	Lunch
13:00 – 16:00	On line training platform functionality and documentation
16:00 – 16:30	Feedback
16:30 – 17:00	Q&A

Online Course Delivery Model

1. The Trainer registers students to the TTP website.

2. The trainer decides which course and if the student will study online or in the classroom.

3. Online students will get an automated email with details of how to log on.

4. The student logs on via the link to complete all training, end-of-unit assessments and final theory exams.
Access to the platform is available for 12 months.

5. The trainer will be informed by automatic notification once the student has completed the online training and assessments.

6. At this point the results will be automatically updated in the students record on the TTP website.

7. The trainer can now invite the student (or the students company) to the practical training and assessments.

8. The trainer updates the results and requests the appropriate TTP ID card via the TTP website.

9. If successful, the student will receive a Train the painter 5 year ID card.

Accredited Courses Available

The theoretical syllabus of all Train the painter accredited courses are available online through the training platform or delivered by an approved Trainer in the classroom. Courses have a practical element.

All must be delivered by an Approved Trainer.

Core Courses

Course name	Study options	Course Content	Approved by
Protective Coatings Applicator	Classroom: 5 days Blended: 40 hours online and 8 hours of practical training.	<ul style="list-style-type: none"> • Health and Safety • Access, Plant and Equipment • Surface Preparation • Coating Types • Coating Application • Quality Control 	 
Abrasive Blast Cleaner	Classroom: 3 days Blended: 8 hours online and 8 hours of practical training.	<ul style="list-style-type: none"> • Health and Safety • Blast Media • Standards and Quality Control • Operational Procedures • Process Control 	 
Spray Painter	Classroom: 2 days Blended: 8 hours online and 8 hours of practical training.	<ul style="list-style-type: none"> • Health and Safety • Paint Materials • Airless Spray Equipment • Conventional Air Spray • Plural Component Spray 	 

Supplementary Courses

Course name	Study options	Course Content	Approved by
Thin Film Intumescent Coating Applicator	Classroom: 3 days Blended: 8 hours online and 16 hours of practical training. (additional 8 hours of H&S training if CSCS card is required)	<ul style="list-style-type: none"> • Characteristics and Generic Types of Thin Film Intumescent Coatings • Product Literature, Training and Coating Application • Dry Film Thickness • Quality Control • Health and Safety • Inspection Equipment 	 
Thermal Metal Spraying Applicator	Classroom: 2 days Blended: 8 hours online and 8 hours of practical training.	<ul style="list-style-type: none"> • Health and Safety • Pre Surface Preparation • Surface Preparation • Flame Spray • Arc Spray • Inspection of thermal metal spray • ISO 14918, ISO 2063 	
Marine Coating Applicator	Classroom: 2 days Blended: 8 hours online and 8 hours of practical training.	<ul style="list-style-type: none"> • Design and types of ships • Why we paint ships • Methods of surface preparation • On board and ballast tank maintenance • Marine coating systems and dry docking • How to prepare and line a tank 	
Water Jetting	Classroom: 2 days Blended: 8 hours online and 8 hours of practical training.	<ul style="list-style-type: none"> • Introduction to high pressure water jetting • Coating systems used with high pressure water jetting • Risk assessments for site working • Method statements and checklists • Water jetting standards (ISO and SSPC/NACE) • High pressure water jetting to sea going vessels offshore structures and general steel structures. 	
Coating Supervisor	2 day online tutor led class (Available online)	<ul style="list-style-type: none"> • Introduction and Objectives of the course • Duties of a Supervisor • Material Health & Safety Data Sheets • COSHH Assessment, Risk Assessment and Method Statements • Painting Specifications • ISO and Other Standards • Product Data Sheet • Basic Paint Technology • Paint Failure • Paint Inspection 	
Powder Coating Application	3 day online tutor led class (Available online)	<ul style="list-style-type: none"> • Introduction and Use • Formulation and Manufacturer • Surface Preparation and Application • Testing and Inspection • Health and Safety • Standards 	

Training Accreditations

Train the painter ID cards are requested by approved Trainers directly from the training platform

- Valid for 5 years.
- Verifiable on the Corrodere academy student directory
- Specified Globally

Trainee ID card

- Less 1600 hours experience in Protective Coating Application
- Less 800 hours in Spray Painting
- Less 800 Abrasive Blast Cleaning

Silver card

Bronze card

Gold card

QCA Certification

The QCA Certification programme has been written by industry experts and approved by Lloyd's Register to meet the growing demand from the Industrial and Marine Coatings industry for independently assessed and Certified Coating Applicator professionals.

QCA – P1

Protective Coating Application

Pre-Job Preparation

Safety briefing, risk assessment, PPE/RPE selection, H&S briefing

Panel Preparation

Check for surface contamination, irregularities and defects

Hand / Power Tool Cleaning

Paint / Coating Products (Pre-Application)

Product Data sheets, Correct PPE/RPE, Mixing, Environmental conditions

Paint / Coating Products (Application)

Brush and roller application procedures according to Product data sheet. Good working practices

Paint / Coating Products (Post-Application)

Clean up and house keeping

QCA – A1

Abrasive Blast Cleaning

Pre-Job Preparation

Safety briefing, risk assessment, PPE/RPE selection, H&S briefing

Panel Preparation

Test panel for surface contamination, irregularities and defects

Pre-Blast Inspection

Equipment set up and associated parts, power requirements, abrasive media

Testing Abrasive Blast Cleaning Equipment

Abrasive Blast Cleaning to appropriate Standards

Quality Control Tests on prepared plates

Abrasive Blast Cleaning Equipment – Clean up

QCA – S1 Spray Painting

Pre-Job Preparation

Safety briefing, risk assessment, PPE/RPE selection, H&S briefing

Panel Preparation

Test panel for surface contamination, irregularities and defects, surface preparation standards

Airless Spray Equipment Set up

Power and equipment, equipment and parts safety checks

Paint / Coating Products (Pre-Application)

Product Data sheets, correct PPE/RPE, mixing, environmental conditions

Use of Airless Spray Equipment

Application of specific products, film thickness, correct application finish, equipment shutdown

Airless Spray Equipment

Clean up of equipment and general housekeeping

QCA – T1 Thin Film Intumescent Application

Pre-Job Preparation

Safety briefing, risk assessment, PPE/RPE selection, H&S briefing

Panel Preparation

Test panel for surface contamination (steel/primer), steel irregularities and defects, surface preparation standards (steel only – clean primer)

Airless Spray Equipment Set up

Power and equipment, equipment and parts safety checks

Thin Film Intumescent Products (Pre-Application)

Product Data sheets, correct PPE/RPE, mixing, environmental conditions

Use of Airless Spray Equipment (and application of the thin film intumescent coating)

Application of specific products, film thickness (wet and dry), correct application finish, equipment shutdown

Airless Spray Equipment (and application of the thin film intumescent coating)

Clean up of equipment and general housekeeping

MARKETING TOOLBOX

LEVEL 1 FREE

- Printable branded banners and posters for use in your training facilities, including TTP info and your company logo
- Train the painter branded social media announcement template with your company logo
- Feature on the Corrodere training provider directory and map
- Printable Train the painter branded leaflet including your company logo, contact details and website
- A single webpage wireframe template to create your own Train the painter page
- Content and imagery to use on your own website
- Promotional posts on social media highlighting your offers/facilities etc
- One feature in Corrodere emailer

LEVEL 2 £POA

- Build of single Train the painter webpage including SEO tags (Wordpress or Square Space only – enquire for full details)

PLUS

We also offer logo creation and can create bespoke packages to suit your needs.

And, packages of any level have the option of a reduced rate advertising bundle in one of our partner magazines.

Terms & Conditions

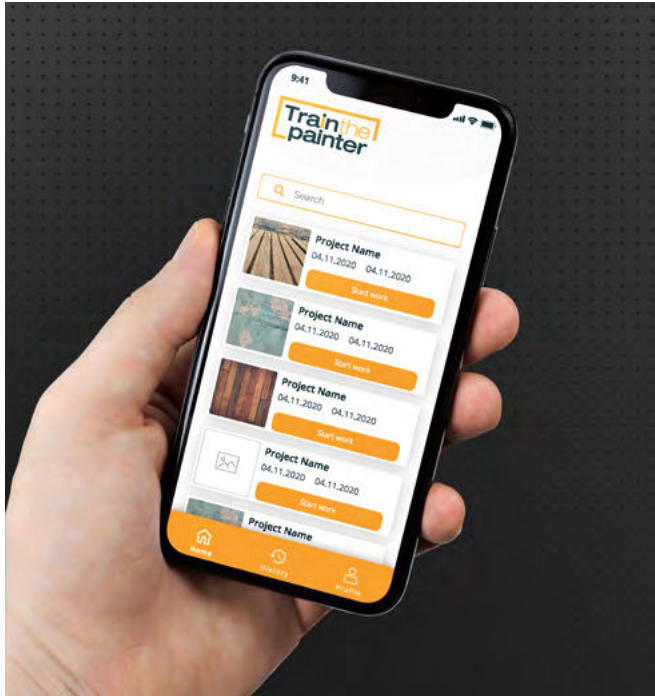

Please do not create any social media accounts in the name of Corrodere or Train the painter. You can send your posts for inclusion on the Corrodere channels to chloe@corrodere.com

Please do not remove or alter any of the trade-marks, trade names, logos or other branding that has been included in the Marketing Tool Box and ensure any marketing materials comply with the brand guidelines.

*Please note any website creation will have an annual fee of £165 for hosting.

Log Book App

An advanced method of electronically logging, verifying and monitoring tasks completed at work.

Click below to watch the instructional video on how to use the Train the painter log book app.

Skills development programme

To cultivate fresh talent for the Industrial Coating industry, we are proud to introduce the Industrial Coating Applicator Skills Development Programme. We are providing our guidance, expertise, and years of experience to assist our Approved Trainers in mentoring and training new talent. Our mission is to ensure these trainees are well-prepared, both in terms of Health & Safety and competence, as they enter the industry.

Qualifications include (see page 3 for details)

- Protective coatings application
- Abrasive blast cleaning
- Spray painting

Trainers have access to our Logbook app to streamline and monitor all training and funding is available to CITB levy paying companies.
